Profile

- An Engineer with a total 5 years of experience with 6 months of experience at GeeksForGeeks as a trainee Engineer and 4.6 years of experience at TechMahindra as (IMS/SDM)L1 network engineer.

❖ Telecom Knowledge(IMS/SDM):

Working as a L1 engineer for IMS nodes(**HSS/MNP/SDL/HLR/MNP/STP/ DRA/SPS**) of Rakuten JAPAN Network in Rakuten SYMPHONY INDIA with over 4.6 year experience in in VoIP, VoLTE, SIP, and IMS/SDM domain operations and quite familiar with **deployment process**. Proven expertise in IMS Core Nodes, troubleshooting using **Wireshark, RADCOR, ForeSight, and Linux CLI**. **Skilled in ticket handling, CR execution, node health checks.**

Protocols Knowledge: – HTTP, SIP, Diameter, Websocket.

Debugging Tools :- Wireshark, RADCOR, Linux for checking Transaction logs and Pcap files.

Emulator:- Putty, Xshell, Remote Desktop

Monitoring Tool expertise :- NetAct, ZABBIX, Grafana, SOP

OS: – Linux, Windows, MacOS

❖ Technical Knowledge:

Programming languages : Java, C, C++, Python.

WebTechnologies: HTML, CSS, JS, React, Springboot, MYSQL

Dev:- GIT, Kubernetes, Jenkins, Jfrog.

Cloud: AWS, Microsoft Certified: Azure Administrator Associate

Professional Summary:

Project – IMS Operation for RAKUTEN mobile project. (Since Feb-2022 till date)

Description- Working as Core operation **L1 engineer** in Tech Mahindra for Rakuten mobile client.

Mainly working for an IMS operation project.

Domain Knowledge: -

- Involved in operations of **Cloud-native (CNF) and Virtual Network Functions (VNF)**, gaining hands-on experience with **Kubernetes-based environments and core container orchestration concepts**.
- Hands-on experience with IMS Core & Nokia IMS Nodes including HSS, SDL, SBC, DRA, STP, Open BGW, CFX(P/S-CSCF), I-BCF, I-CSCF, PGW, SGW, PCRF, DNS, MRF, MGCF, BGCF, MSS, TAS.
- Skilled in troubleshooting and log analysis using **RADCOR, ForeSight, Wireshark, RCP, Linux CLI, WinSCP, JIRA**.
- Performed VNF reboot/restart, disk space and CPU optimization, core file verification, and subscriber **provisioning failure analysis (Nokia Flow One, B2B/B2C/Readlite)**.
-
- Good handling of **RADCOR, FS (Fore Sight), and RCP (Rakuten Cloud Platform)** Clients.
- Having good knowledge of IMS call flow –Registration, Call, SRVCC, CSFB, Call conference as well as all nodes of IMS.
- Daily health check of all IMS core nodes like CFX, DNS, SBC, HSS, MRF, MSS, TAS, MGCF.MGW. BGCF, etc.
- Basic knowledge of Node deployment-Creating VNF-Packages, modifying.
- Daily health checkup, preparing daily network reports and utilization.
- Suitable for Working in a 24/7, multiple customer shift environment .

- Active alarm analysis & Corrective action for faults, daily & Monthly health checks in IMS.
- Performance Monitor -KPI analysis on dashboard and Customer dashboard
- Ticket Handling – Ticket creation based on Severity, priority, Alarm, KPI Threshold (Dip / Spike), Assigned to next level based on Ticket category. Resolving Ticket with proper RCA and if necessary, assigned to L2 / L3 and Vendor team. Preparing Ticket report on daily and weekly basis and present to daily review and weekly performance meeting.
- Change management- Support in the daily activity performed by the L2 team and do pre health check and post health check during the activity, if observed abnormality then immediately report the issue.
- On demand Dashboard- if required then Create on demand dashboard during the activity for the kpi's.
- Manually clearance- After the incident if there are any active alarms then clear from EMS(NetAct/Zabbix) with resolution.
- Knowledge of other Telco nodes – E-link, WRG.

Daily Task –

>Involved in Ticket resolution, which is based on Alarm, KPI, End to End Team and related to customer tickets. TT handling using LINUX commands and KPI GUI.CR management. Presenting morning and evening meetings to the Japan and India team with full cover of TT part, CR part, Alarm handling, KPI part, Major and critical ongoing incidents.

> If any Critical incident happens, immediately involve to L2/L3/Shift lead and Vendor and open the Emergency Ticket.

>Handling customer issues, Logs/PACP extracting and analyzing, performing VNF reboot/restart, reducing disk space for script command, handling Trouble tickets, performing health checks for IMS nodes,subscriber utilization of core nodes, KPI monitoring for IMS nodes. Doing a Health check of all IMS nodes.

> Preparing Daily proper Handover and track of all the major tickets.

> Involved KT session for ongoing project once in month which helps to gain knowledge for internal team members.

>Fault monitor - if observed any alarms then check the description and verify if the alarm is major/critical then report it to the senior team and create a ticket for the same.

>Knowledge Hub - Every week I collect the data and verify the issue which comes daily and changed in daily trend then upload on Knowledge hub.

1. Tech Mahindra.(Dec-2021 to Feb-2022)

Project –TechMahindra Employee Portal.

Responsibilities: Contributed as a full stack developer where given the multiple functionality IDEA and also implemented.

2. GeeksForGeeks(June-21 to Dec-21):(Trainee Engineer)

ACHIEVEMENT

- ❖ Given (research paper) Problem solution to **Automotive research association of India.**
- ❖ Programming certified by **IIT Kharagpur.**

- ❖ **“Smart India hackathon 2020”** Grand final presenter as a **Team Leader**

Professional Qualification:

- ❖ **Bachelor of technology in computer science-: 7.5 CGPA**
Sagar institute of research and technology, Indore (2017-2021)
